Note: All values are pairwise Pearson correlation coefficients. Variable names are abbreviated as follows: IND_IT_SW_TEL = IT/Software/Telecommunications industry dummy; IND_BIO_PHARM = Biotechnology/Pharmaceutical industry dummy; IND_MFG = Manufacturing industry dummy; IND_FIN_INV = Finance/Investment industry dummy; SENTIMENT_SCALED = scaled sentiment measure; INFO_GROUP = information uncertainty group; LOG_NEWS_SCALED = scaled logarithm of news count; LOG_ASSETS_SCALED = scaled logarithm of total assets; LEVERAGE_SCALED = scaled leverage ratio; MBV = market-to-book value ratio; LOG_MBV = logarithm of market-to-book value ratio. Correlation coefficients are rounded to five decimal places for diagonal elements and five decimal places for off-diagonal elements.
